

Remote Work Policy – Meridian Analytics Inc.

Eligibility

Employees in roles that do not require regular on-site presence (e.g., most Engineering, Data, and certain Finance roles) may work remotely up to 3 days per week, subject to manager approval. Fully remote arrangements require Director-level sign-off.

Equipment

The company provides a laptop, monitor, and a one-time \$400 home office stipend for employees approved for regular remote work. Additional equipment requests are reviewed by IT on a case-by-case basis.

Core Collaboration Hours

Remote employees must be available and responsive during core hours of 11:00 AM to 4:00 PM in their local time zone, aligned with the standard working hours defined in the Employee Handbook.

Security Requirements

Remote employees must connect to company systems via the corporate VPN and must not access client data from personal, unencrypted devices, in line with the IT Security Policy.

International Remote Work

Employees wishing to work remotely from a country other than their country of employment must obtain approval from HR and Legal at least 6 weeks in advance, due to tax and employment law considerations.
