

## Acceptable Use Policy – Meridian Analytics Inc.

### Scope

This policy governs the acceptable use of company-owned devices, networks, and accounts, including email, cloud storage, and internal collaboration tools, by all employees and contractors.

### Permitted Use

Company systems are provided primarily for business purposes. Limited personal use is permitted, provided it does not interfere with work responsibilities, consume excessive resources, or violate any other company policy.

### Prohibited Activities

Employees may not use company systems to access illegal content, install unauthorized software, circumvent security controls, or run personal side businesses. Installing browser extensions or applications not approved by IT is prohibited on managed devices.

### Email and Communication

Company email should not be used to send Restricted or Confidential data to personal email accounts. Auto-forwarding rules that send company email to external addresses are disabled by default and require IT Security approval to enable.

### Monitoring

The company reserves the right to monitor use of company systems, including email and internet activity, for security, compliance, and legal purposes, consistent with applicable law and the IT Security Policy.

### Enforcement

Violations of this policy may result in disciplinary action up to and including termination, and in some cases may be referred to Legal or law enforcement, particularly where illegal activity is involved.
