

Password Policy – Meridian Analytics Inc.

Minimum Requirements

Passwords must be at least 14 characters long and include a mix of uppercase letters, lowercase letters, numbers, and special characters. Passwords may not reuse any of the employee's last 10 passwords.

Multi-Factor Authentication

Multi-factor authentication (MFA) is mandatory for all systems classified as handling Confidential or Restricted data, including email, the HR portal, and the client data warehouse. SMS-based MFA is discouraged in favor of authenticator apps or hardware keys.

Password Expiration

Passwords for standard corporate accounts expire every 180 days. Passwords for administrative or privileged accounts expire every 90 days and require approval from IT Security to reset outside the normal cycle.

Password Managers

Employees are required to use the company-approved password manager for storing credentials to work systems. Storing passwords in browsers, spreadsheets, or plain text files is prohibited under this policy.

Account Lockout

Accounts are automatically locked after 5 consecutive failed login attempts within a 15-minute window. Locked accounts can be unlocked by the employee via self-service identity verification or by contacting the IT Helpdesk.
