

Master Services Agreement – Client: Halden Manufacturing Corp

This Master Services Agreement ("Agreement") is entered into between Meridian Analytics Inc. ("Provider") and Halden Manufacturing Corp ("Client") for predictive maintenance analytics services.

Scope of Services

Provider will deploy and maintain a predictive maintenance model for Client's manufacturing equipment, deliver weekly anomaly reports, and provide on-call support for critical alerts during Client's production hours.

Term

This Agreement has an initial term of 36 months from the Effective Date. Early termination by Client prior to month 18 requires payment of an early termination fee equal to 3 months of retainer fees.

Fees

Client agrees to pay Provider a monthly retainer of \$62,000. Fees are subject to an annual increase of up to 4%, tied to the Consumer Price Index, beginning in the second year of the Agreement.

Service Level Agreement

Provider guarantees 99.5% uptime for the predictive maintenance dashboard and a response time of under 2 hours for critical anomaly alerts during Client's production hours. Failure to meet the SLA in two consecutive months entitles Client to a service credit of 10% of that month's fee.

Data Ownership and Confidentiality

Sensor and equipment data provided by Client remains Client's property. Provider may retain de-identified, aggregated data for internal model improvement purposes only, as permitted under Section 8.2.

Limitation of Liability

Provider's total liability under this Agreement shall not exceed the fees paid by Client in the 12 months preceding the claim, except in cases of gross negligence, willful misconduct, or breach of confidentiality obligations.
