

Vendor Agreement Policy – Meridian Analytics Inc.

Vendor Onboarding

All new vendors must complete a security and compliance questionnaire administered by the IT Security team before any contract is signed, particularly for vendors who will process client or employee data.

Standard Payment Terms

Unless otherwise negotiated, vendor agreements use Net 45 payment terms. Vendors requesting Net 30 or faster payment terms must be approved by the Finance Director, as this may affect cash flow planning.

Data Processing Vendors

Vendors that process personal data on Meridian's behalf (e.g., cloud infrastructure, analytics tools) must sign a Data Processing Addendum (DPA) in addition to the main vendor agreement, and must demonstrate SOC 2 Type II compliance or equivalent.

Termination Rights

Standard vendor agreements include a termination-for-convenience clause allowing Meridian to exit the agreement with 60 days' written notice, except for vendors providing critical infrastructure, which require 120 days' notice.

Renewal Review

Vendor agreements above \$50,000 in annual spend are reviewed by Procurement and Finance 90 days before renewal to evaluate performance, pricing, and whether the vendor relationship should continue.
